apprehension that this country, in sending commissioners to the Samoan conference, should have selected men without convictions or nerve.

New York doesn't want to feed the \$,000 troops Pennsylvania is going to send to her Centennial, and Pennsylvania is almost mad enough to feed them herself. What a world of bickering that celebration has kicked up.

A New Jersey justice astonished some Princeton fellows by telling them that even college students have no right to get drunk and make innocent people suffer. Has it come to this, that society is no longer willing that "boys shall be boys?"

A writing machine is usually called a type-writer. The person who operates the machine is invariably called a type-writer. Why not make the necessary distinction by calling the writing machine what it is? It is just as easy to avoid a confusion of terms.

Boulanger's Source of Supply.

France desires to know where Boulanger gets the money he dispenses as though it were water. Perhaps Germany could tell. Not long ago a French writer stated as a fact of his knowledge that every week an emissary from Bismarck visited Boulanger to bear important dispatches and money for his campaign of enlightenment.

This is not an improbable story. Boulanger is playing and plotting for Boulanger, It is not the sort of man to be nice about his methods or his confeder.

Bismarck knows that Germany can well afford to keep France in hot water, her politicians warring, her people divided. As European politics goes, it would be good polities to keep Boulanger going at a dazzling gait.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years are as upposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease, and therefore requires constitutional treatment.

Under that benighted decision as safe a way as any is for the newspaper to take its chance on the toss of a copper.

Our countrywomen of the highly civ ilized East, who have nothing else to do, are discussing the important question should women smoke? The discussion suggests that there are women who wish to smoke and would like to have an af-

firmative answer on high authority. It should be explained that the discussion relates to cigarette smoking. Those high dames are not thinking about cigars or pipes-these they exclude at once as lacking in daintiness and fine sentiment. It is the delicate looking cigarette, on which one woman devotee

has already written a rhapsody. If a woman thinks she must smoke, by all means let her devote her leisure moments to an honest cigar or a clay pipe filled with good tobacco. There is nothing dainty or sentimental about either, but it is possible to smoke a cigar or a clay pipe that will not kill at forty rods. Hasn't woman kind ills enough without flying to the deadly eigarette?

Of course this is a palpable freight dis-crimination, and if the Inter-State Railway Association is organized for any thing it should be to take hold of just such a case. But the members of that association seem to think there is nothing for them to do because Armour & have a contract with the St. Paul road. What, then, is to prevent any other road from entering into a contract to defeat the inter-State commerce law?
